

pasión. not simple passion.

The common denominator of the regularly selected international designers behind the ames brand collection is the clearly structured formal language of their creative abilities. Their encounters with the ames brand are encounters with new creative impulses. Cool and precise linearity meets rhythmic drive. A build-up of tangible tension generated between contrasting poles. A tension far beyond simple inspiration.

ames[®]einn

As the first designer product from the ames brand, the Icelandic designer Erla Sólveig Oskarsdóttir designed an item of furniture with precise as well as organic line management. She created a design in which the interplay of simple functionality and eloquent shape can be both seen and sensed. The result is ames einn – a range which at first glance appears plain and reduced, but is given an eloquent flair by rolling, lively curve of the back.

sweeping curves
different colours
durable synthetics
easy stackable

Erla Sólveig Oskarsdóttir, the Icelandic designer, conceived the first piece in the **ames** collection in the form of a chair with equally precise and organic lines. Although in essence an unostentatious and simple design, the sweeping curve of the backrest characterises its passionate accentuation. **ames einn** stands on a satin-chromed, tubular steel frame, the seat and back are in UV-resistant, durable synthetics. **ames einn** is available in six different colours which underline its versatility for a wide range of colour combinations. And the whole thing – as always with **ames** – is stackable!

Another member of the **ames** family is the **einn table** which is available in two size variations, as a standing table and a cafeteria table. The design was inspired by a wooden cable roll converted into a table on which the designer gladly ate chocolate cake as a little girl. The styling deliberately leaves the chair's lines and is understood to be an independent, modern object for the indoor and outdoor area. The four-part tables are available in various wooden décors.

The **ames einn** line is completed through two barstools which are available in two height variations, 67 or 80 cm. As a result, **ames einn** is an adequate chair/stool/table line for conference, catering trade and the private realm.
